

ALU MI NIUM BOUW PROD UCTEN

MEILOF RIKS bv

Discover the unique concept of Meilof Riks bv and let yourself be inspired by our aluminium construction products. With our prefab solutions, available in lengths of up to 16 metres, we offer unprecedented possibilities. In this brochure, you will find examples of our standard and bespoke models, developed, produced and installed by our specialised teams.

Bespoke aluminium construction products

At Meilof Riks bv, all our aluminium construction products are fully custom-made in our own production halls. These low-maintenance and fully recyclable products have a long service life. As standard, you receive a 6-year guarantee on all our products.

Top-quality aluminium in colour

For our construction products, we use only high-grade AlMg3 aluminium supplied by reliable European suppliers. This corrosion-free, colour-coated material is strong, flexible and lightweight. It offers extensive processing options such as bending, edging, milling, slitting and bonding.

BIM library models

Our construction products are available in the BIM library as Revit and Archicad files.

Self-Supporting Gutters

Our high-quality aluminium self-supporting gutters have a sleek appearance. The prefab gutters are finished as standard with a trim on the front and a drip edge underneath. Optionally, the front can be finished with a bead and the underside with a drip groove. Both the trim and the bead can be supplied in a different RAL colour from the gutter. In addition to the standard models, bespoke options are available on request.

Bargeboards

Our aluminium bargeboards ensure a neat finish to homes and buildings. Thanks to the low-maintenance nature of aluminium bargeboards, considerable savings can be made on maintenance costs. These products are custom-made and can be fitted with profiling, finials, brackets and lambrequins. The aluminium bargeboards can be realised in either single-walled construction or with the unique sandwich construction.

Frames

Prefab aluminium frames/reveals for an aesthetically sleek and modern look. There is a wide selection of models, colours and dimensions. In addition to our standard models, bespoke options are available on request. The combination of high-quality lightweight aluminium and prefab production enables easy installation. This results in lower costs, faster construction times and greater flexibility in design.

Roof edges

For an aesthetic and tidy finish to roofs, we offer prefabricated aluminium roof edges. There is a wide choice of models, colours and lengths up to 16 metres. In addition to our standard models, bespoke options are available on request. The combination of high-quality lightweight aluminium and prefabricated production makes it possible to use a cheaper and simpler substructure for roof edges. This results in lower costs, faster construction times and greater flexibility in design.

Façade bands

Our prefab aluminium façade bands are suitable for both horizontal and vertical installation, enabling unique façade designs. The lightweight nature of the façade bands makes them an innovative and efficient solution that not only offers design freedom and sustainability, but also contributes to simple, safe and fast construction processes. There is a wide choice of models, colours and lengths up to 16 metres for a seamless finish. In addition to our standard models, bespoke options are available on request.

(Design) panels

Our prefab aluminium panels can be applied for a sleek finish to homes and buildings. If desired, the panels can be provided with a print, house number or design. Various (perforation) patterns can be created to specific design requirements in flat, sloped or profiled sections. The panels are available in any desired RAL colour, making them perfectly suited to the aesthetic requirements of each project.

Nest boxes

As more natural nesting sites disappear, we offer birds a new place with the nest boxes from Unitura. These can be integrated into our prefab aluminium construction products: self-supporting gutters, façade bands or roof edges. There are models for swifts, house sparrows and bats. The nest boxes, made from high-quality WPC boards, comply with the Nature-Inclusive Renovation Code of Conduct and support biodiversity.

After

Renovation

For renovations, our prefab aluminium construction products can be used, and we take care of the delivery, dismantling, installation and additional work. Our construction products can be adapted to solve thermal bridge issues. For renewed and insulated building envelopes or roofs, we offer a wide range of prefab aluminium construction products such as gutters and bargeboards.

Powder coating and wet painting

Meilof Riks bv has its own powder coating and wet painting facilities for products in special RAL colours. This makes us extra flexible and less dependent on third parties. The powder coating facility is gas-free and operates entirely on electricity we generate ourselves. All of this makes powder coating CO₂-neutral. The quality of our work is guaranteed by certification with the Qualicoat label.
